Core Aeration Made Easy

Ryan Introduces New Lawnaire Core Aerator with Easy Steer Technology

Ryan, an industry-leading brand of turf care equipment, has expanded their line of walk-behind aerators to include a unit that features new Easy Steer Technology. The New Lawnaire V *with* EST combines all of the same great performance and user-friendly features and benefits as Ryan's current Lawnaire V core aerator with a new tine assembly that enables the unit to turn easily while in the aeration process – without removing the tines from the ground.

"The difference is in the tine bank assembly", states Ryan product manager, Jay Baudhuin. "Each tine wheel assembly has a one-way clutch bearing. This design is responsive to the operator and enables easy turning capability while the tines are in the ground. This new tine design enables easy turning capability without costly hydraulic tine assemblies or dissimilar controlling mechanisms."

The handle isn't the only familiar tried and true component of the new Lawnaire V *with* EST. The Lawnaire V *with* EST utilizes 90% of the same components as the current Lawnaire V, so it has the proven, durability and reliability of the Ryan name while minimizing the number of new service parts required for dealers to stock, and helps maintain a low cost of ownership for the customer.

When you need to cover a lot of ground fast with professional results, the high-speed, ultra-productive Lawnaire V *with* EST is the aerator for the job! With an aeration speed of up to 45,000 square feet per hour and a 26.5 inch aeration swath, the LA-V *with* EST will certainly get the job done quickly. New easy steer technology reduces user fatigue by allowing the user to steer the unit without taking the tines out of the ground making the unit more productive because it is easier to use. The drum-style, self-propelled aerator features solid steel axles mounted on construction grade sealed ball bearings, a single nickel-plated drive chain (tine & drum) for durability, and easy to remove rear wheels enable the LA-V *with* EST to get through standard yard gates with ease.

Lawnaire V *with* EST Features:

Honda® GX 120, 118cc engine

- Drum style, self-propelled
- Nickel-plated chain drive (tine & drum)
- Solid steel axles
- Construction grade sealed ball bearings
- Covered lift grips and front bumper guard for secure transport
- Semi-pneumatic tires with ball bearings (8 x 2.25")
- Easy to attach dual weights

Specs:

Coring Depth: up to 2.75 inches

Coring Diameter: .75 inches

Aerating Width: 26.5 inches

Aeration Pattern: 3.75" x 7"

Aerating Speed: up to 45,000 sq. ft./hr.

Weight (dry without weights): 250 lbs.

Width: 35.5"

Length: 53.5"

Height: 48.5"

About Ryan

For over 60 years professionals have reached for Ryan turf renovation equipment to transform landscapes and maintain healthy, thick turf. The Ryan line of turf renovation equipment includes: aerators, dethatchers/turf rakes, overseeders, sod cutters and other specialty products that serve the landscaping and grounds care professional. Ryan turf renovation equipment is available through power equipment retailers and rental dealerships nationwide.
