Built for years of reliable operation, the Ren-O-Thin Power Rake is the leader in efficient dethatching and breaking up of aeration cores.

An easy-to-operate height adjustment lets you fine-tune from one inch above the ground down to 7/8 of an inch below. A pivoting front axle helps keep three wheels on the ground at all times, preventing hazardous scalping. Four interchangeable reels make customization easy. With the simple loosening of just two nuts, you can switch between a flail-type reel and three fixed-type reels with varying blade thicknesses and spacings. Available with a Honda® or Briggs & Stratton® engine, the Ren-O-Thin Power Rake offers the kind of performance that boosts your bottom line.

The pivoting front axle helps keep three wheels on the ground at all times to prevent scalping.

Four easily interchangeable reels allow you to easily customize the Ren-O-Thin for any situation.

The unique bubble hopper on the back of the Ren-O-Thin allows thatch to escape and not get caught under the deck and bunch up.
