NEW! LAWNAIRE® IV & V WITH EASY STEER TECHNOLOGY

Legendary Lawnaire Performance and Durability Now with EST - Easy Steer Technology. The newly redesigned tine assembly allows the user to steer the unit without taking the tines out of the ground. This is accomplished by designing each tine assembly to independently rotate yet be able to drive. This translates into higher productivity and less physical stress on the operator because it is easier to use.

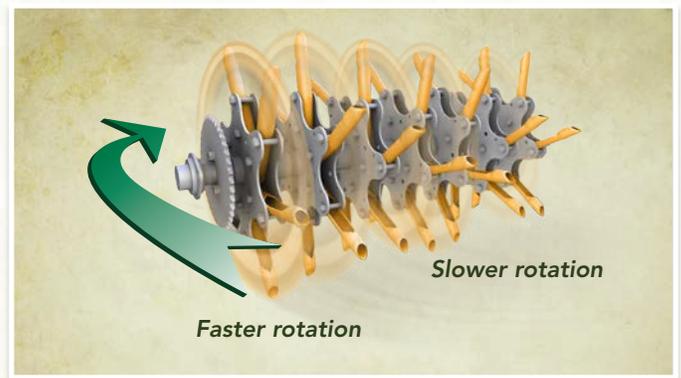

The same convenient features and durability as the standard Lawnaire units. The new Lawnaire Aerator *with* Easy Steer Technology has the same valuable features that are found on the standard Lawnaire units, such as, removable weights, front bumper guard and throttle control up by the operator area. The new Lawnaire *with* EST is simply the best, most productive aerator on the market and is ideal for lawn care operators who know that time means money and rental houses that want to offer their customers the best lawn care equipment in the market.

HEALTHY *EST*

Core aeration helps promote healthy turf by relieving soil compaction. With a Hole Pattern of nine (9) holes per sq. ft., at up to 2.75-inches deep, the soil benefits from a deep, uniform close hole pattern allowing you to cover more ground in less time.

FAST *EST* & EASY *EST*

Intuitively responsive, the EST's outer tines rotate faster as the operator steers left or right, embracing the turns while maintaining deep core penetration. See for yourself how easy aeration can be when you take control.
